

Ecoventures

Calling all future Scientists & Science Teachers

Girl Scouts of Michigan Trails **Ecoventures program** is looking for college students interested in the science field to serve as advisors for our teen Ecoventure Guides. Ecoventures is a science/math education program for elementary students in Girl Scouting.

Ecoventure Guides create and facilitate science experiments across West Michigan at Saturday Ecoventure Days. As an advisor, you would help create and implement lessons, help train the Ecoventure Guides and act as supervisor at Ecoventure Days. **Advisors are paid \$50 per Ecoventure Day, plus mileage.**

If you have reliable transportation and are looking for teaching experience or just a way to give back to the community, Ecoventures is the right fit for you!
